# LÉOPOLD BURON

## ABOUT

I have been practising digital investigation since I was 16, and professionally for over 4 years. Initially self-taught and trained on military cases during the onset of the Ukraine conflict, then within the crypto ecosystem, I have acquired strong expertise in analysing APT groups and their large-scale attacks. Passionate, rigorous and focused on technical aspects, I am now seeking to join a team on a permanent contract to dedicate myself fully to technical work.

#### Professional Experience

## Founder & Principal Analyst

Apr. 2022 - Present

MITAME (digital investigation consultancy)

Remote

- Conducting technical investigations for diverse clients (B2B and B2C).
- Forensic analysis, **OSINT**, modelling and cybercriminal identity research.
- Authored reports contributing to **3 confirmed arrests** (US/Thailand).
- In-depth knowledge of major APT TTPs such as Lazarus APT38.

# Human Vulnerability Researcher (OPSEC/SE)

Feb. 2023 – Present

Remote

Binance (independent contractor)

- Identification of social engineering vectors and OPSEC vulnerabilities.
- Detailed reports on attack tactics to improve security posture.

## Node Deployment and Security Technician

Feb. 2024 - Nov. 2024

Starknet Foundation (StarkWare)

Remote

- Infrastructure auditing and supplier selection via technical **benchmarks**.
- Secure node deployment using Ansible.

## Cybersecurity Analyst

Jan. 2024 - Feb. 2024

Laval, France

ComptaCom (placement)

- Sensitive information research via **OSINT**.
- Vulnerability identification and remediation.
- Development of a **detection and reporting** tool for vulnerabilities.

## **EDUCATION**

## BTS SIO - SISR Option

2022 - 2024

Esup Rennes

• Top of class, specialising in secure infrastructure and systems.

Integrated Preparatory Class – Industrial Engineering and ManagementSept. 2021 – Feb. 2022

• Ranked top 15/55 before withdrawal (health reasons, fully resolved).

#### SKILLS

Threat intelligence monitoring: Infostealers (Lumma, Radamanthys), Clippers, SEO spoofing.

Security & investigation: Threat Intelligence, OSINT, TA analysis, frameworks (MITRE ATT&CK, CAPEC, NIST, TheHive, MISP).

Cloud & infrastructure: AWS (EC2, S3, IAM), Kubernetes (K3s), Docker, Proxmox, Ansible, GitLab CI/CD. **Development & scripting:** Python, Bash, TypeScript (Next.js), Git.

## CERTIFICATIONS AND LANGUAGES

Certifications: AWS Cloud Practitioner (preparing SAA & SCS-C02), TOEIC (890/990).

Languages: Bilingual English-French.

Interests: Cybersecurity, finance/blockchains, music (piano/guitar), sailing.

#### SIDE PROJECTS

Homelab: in production since 2021 — stack: Proxmox, Ansible, GitLab CI/CD, Traefik, Wazuh.

Bug Bounty: reports on CursorAI (8/10), OVH (4/10), X/Twitter (1/10) — targets: web misconfigurations.
